DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 6 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 6 and 15 recite the limitation " R^3 is a perfluoroalkyl group" in lines 1-2 of the claims. There is insufficient antecedent basis for this limitation in the claim. Note that claims 1 and 10 (in which claims 6 and 15 depends respectively) limit the variable R^3 as being "an alkyl or aryl group".

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 10-12, 16, 19 and 20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Pat. No. 3,590,060. The '060 U.S. Patent discloses a series of monomeric tin compounds containing at least one 3,3,3-trifluoropropyl group. See entire patent, particularly, column 1, lines 47-64 and examples.
6. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Curran et al., Bioorganic & Medicinal Chemistry Letters, Vol. 8, No. 17, pp. 2403-2408 (1998). The

Art Unit: 1621

reference discloses the use of "propylene spaced" allyl tin reagents useful in carrying out a chemical reaction, particularly transition metal catalyzed allylations.

Allowable Subject Matter
